

# Warrior

## An Extractor for Professionals

Designed with convenience in mind for professional cleaners, all controls and connectors are located on the upper panel for easy access and operation. The on board carrying system provides storage for a wand, five gallon bucket, hose and a 1 litre bottle. The 13 gallon solution tank and 11 gallon recovery tank allow you to work longer between draining and filling the tanks and integrated handle and upper casters to assist in loading and unloading.

The vacuum motors in the Warrior are assembled in parallel compared to in series as most other extractors on the market. Using this vacuum system the recovery rate is increased by 25%, which results in faster drying times.
